

# Process & Decision Documentation

Name: Ayushi Lad

Role(s): Editor

Primary responsibility for this work: Use ChatGPT to create a game

## *Goal of Work Session*

Create a game with different states and files that connect to one another.

Tools: VsCode, GitHub, ChatGPT 5.2

## *GenAI Documentation*

If GenAI was used (keep each response as brief as possible):

**Date Used:** February 1, 2026

**Tool Disclosure:** ChatGPT 5.2

**Purpose of Use:** Help with coding

**Summary of Interaction:** I prompted ChatGPT to create the game I wanted to make. I then asked it to add any additional features I wanted such as stars in the background.

**Human Decision Point(s):** I modified the style like the colours in order to make it more of what I wanted.

**Integrity & Verification Note:** I made sure the code was in p5.js and was nothing I did not understand.

**Scope of GenAI Use:** I used GenAI only to write the code, I did not use it for anything else.

**Limitations or Misfires:** ChatGPT gave me some extra code like adding a function for the canvas size stays responsive, but I did not want that.

## *Summary of Process (Human + Tool)*

I used all the code that ChatGPT gave initially to make the game. I then edited the style and some mechanics like the game time to what I wanted. I also asked it to create more graphics like the stars in the background and asked it to give me what to put in the html file.

## *Decision Points & Trade-offs*

I changed the stylistic choices mainly and tried to experiment with adding the stars onto all the screens. It did not work so I had to ask ChatGPT for help.

### *Verification & Judgement*

I tested the code in VsCode whenever I asked it to add something and to verify that it worked and did what I wanted it to.

### *Limitations, Dead Ends, or Open Questions*

I deleted the other files that I did not use but then it ended up breaking my file, the game didn't show, it was just an error. I had to copy and paste the files back in from the example, but I still am unsure why this happened.
